

# Diamond Glow

## Post Care Instructions

- Some patients may experience a mild redness immediately following their Diamond Glow service. This is temporary and generally resolves within a few minutes up to several hours.
- You may apply makeup immediately post treatment.
- Avoid use of topical products containing AHAs, Retinols, Vitamin A, for 3 days post treatment.
- No exfoliating for one week post treatment, as your skin has just received an exfoliation.
- Your skin may feel slightly more sensitive to your skin care products, as the superficial layer of dead skin has just been removed through exfoliation. This is usually very tolerable and requires no special care. However, if a product feels too sensitive, discontinue use for a few days.
- You could experience a breakout following your Diamond Glow service as the skin is purged from impurities. This will resolve on its own, and often becomes less apparent with regularly scheduled Diamond Glow treatments.
