

Genius RF

Post Care Instructions

- Immediately after treatment, you may experience erythema (redness) for 1-3 days, however, for more aggressive treatments this may last longer.
- Slight to moderate edema (swelling) and a mild to moderate sunburn sensation are also common post treatment and may last 1-3 days.
- Skin may crust and peel for 2-7 days after treatment.
- Makeup can be applied 48-72 hours after treatment.
- Avoid strenuous exercise or excessive perspiration, as excess blood flow and sweat can cause discomfort and irritation to compromised skin for 72 hours.
- There are no restrictions on bathing except to treat the skin gently, avoid scrubbing or trauma to the treated area.
- Avoid sun exposure to reduce the chance of hyperpigmentation.
- Apply a zinc oxide sun block with an SPF 30 + at all times after 24-48 hours.
- Multiple treatments over a period of several months may be required to achieve the desired response.
